a bold and imaginative page turner that challenges ideas about the world of antiquity peter frankopan the silk roads this vivid and engaging book brings to life some of the most important moments in ancient history moments that have shaped not only the politics and culture of bygone eras but the institutions thoughts

and fantasies of our time Yuval Noah Harari's *Sapiens* is as panoramic as it is learned. This is ancient history for our globalised world. Tom Holland's *Rubicon* is an acclaimed historian and TV presenter who guides us through an epic story spanning ten centuries to create a bold new reading of the classical era for our globalised world. Scott challenges our traditionally western focused perception of the past, connecting Greco-Roman civilisation to the great rulers and empires that swept across central Asia to India and China, resulting in a truly global vision of ancient history with stunning range and richness. Ancient Worlds illustrates how the great powers and characters of antiquity shared ambitions and crises, ways of thinking and forms of governing, connections that only grew stronger over the centuries as political systems evolved, mighty armies clashed, universal religions were born, and our modern world was foreshadowed. Scott focuses on three epochal moments across the ancient globe and their profound wider significance: from 509 BCE, the birth of Athenian democracy and Rome's Republic; also the age of Confucius's teachings in China; to 218 BCE when Hannibal of Carthage challenged Rome, and China saw its first emperor; to 312 CE when Constantine sought to impose Christianity on the Roman world, even as Buddhism was pervading China via the vast trading routes we now know as the Silk Roads. A major work of global history, Michael Scott's enthralling journey challenges the way we think about our past, re-draws the map of the classical age to reveal its hidden connections, and shows us how ancient history has lessons for our own times.

This is the first world history of empire reaching from the third millennium BCE to the present, by combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires. Its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago, empire was believed to be a thing of the past. Now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume two, *The History of Empires*, tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases.
